

MMPD Usage Protocol

The Multi-domain Mobile Video Physiology Dataset (MMPD), comprising 11 hours(1152K frames) of recordings from mobile phones of 33 subjects. The dataset was designed to capture videos with greater representation across skin tone, body motion, and lighting conditions. MMPD is comprehensive with eight descriptive labels as mat format. The details could be checked on our GitHub repo:
https://github.com/McJackTang/MMPD_rPPG_dataset.

To use MMPD database, you must comply with the following protocols:

- 1. This dataset is built for academic use. Any commercial usage is banned.**
- 2. Authorization to use is restricted to the signers only. No private dissemination without consent.**
- 3. Please follow the academic code strictly. Reference the following:**
